

TOPIC 5 - NEW - DATA MANAGEMENT, ANALYTICS AND DEEP LEARNING

CHAIRS

Global Chair

Alexandru Iosup

Vrije Universiteit Amsterdam, Faculty of Science, Computer Systems, Network Institute, Massivizing Computer Systems

Local Chair

Morris Riedel

Jülich Supercomputing Centre, Institute for Advanced Simulation

Co-Chairs

Jorge Amaya

Katholieke Universiteit Leuven

Mihai Capotă

Intel

Gabriele Cavallaro

Jülich Supercomputing Centre (JSC)

Dmitry Duplyakin

University of Utah

Ernir Erlingsson

University of Iceland

Janis Keuper

Fraunhofer Institute for Industrial Mathematics ITWM, Kaiserslautern, Germany

Helmut Neukirchen

University of Iceland, Faculty of Industrial Engineering, Mechanical Engineering and Computer Science

Animesh Trivedi

Vrije Universiteit (VU), Amsterdam

Ana Lucia Varbanescu

University of Amsterdam

Alexandru Uta

Vrije Universiteit Amsterdam

DESCRIPTION

Many areas of science, industry, and commerce are producing extreme-scale data that must be processed—stored, managed, analyzed—in order to extract useful knowledge. This topic seeks papers in all aspects of distributed and parallel data management and data analysis. For example, HPC in situ data analytics, cloud and grid data-intensive processing, parallel storage systems, and scalable data processing workflows are all in the scope of this topic.

Focus

- Parallel, replicated, and highly-available distributed databases
- Cloud and HPC storage architectures and systems
- Scientific data analytics (Big Data or HPC based approaches)
- Middleware for processing large-scale data
- Programming models for parallel and distributed data analytics
- Workflow management for data analytics
- Coupling HPC simulations with in situ data analysis
- Parallel data visualization
- Distributed and parallel transaction, query processing and information retrieval
- Internet-scale data-intensive applications
- Sensor network data management
- Data-intensive clouds and grids
- Parallel data streaming and data stream mining
- New storage hierarchies in distributed data systems
- Parallel and distributed machine learning, knowledge discovery and data mining
- Privacy and trust in parallel and distributed data management and analytics systems
- IoT data management and analytics
